

AMCO Gripmaster Grades

Gripmaster Premium

- Where to use:** Areas where there is exposed food product, and have a hot-wash-downs.
Warranty: 10 year guarantee against wear and delamination
Foundation: Colorbond, 316 Grade Stainless Steel, Aluminium
Profiles: Square ladder caps, round ladder caps, square nosings, bull-nosings, sheet

The aggregate of our Gripmaster Premium anti-slip products is Silica Carbide. This compound has a *Mohs hardness* of 9.5 (diamond is 10) which allows us to offer such an extended guarantee against wear. No other non-slip nosings or rung covers offer this type of quality. In between the metal foundation and the aggregate there is a woven medium. This means that Gripmaster Premium products can be used in areas where hot wash-downs occur, as the medium allows for any expansion and contraction of the foundation without causing delamination. Finally, the resins used in the manufacture of these anti-slip nosings are of a very high quality. This ensures that none of the 'grip' can break away as with 'cheapo' styles.

Gripmaster Select

- Where to use:** Areas where there is exposed food product, but no hot-wash-downs.
Warranty: 3 year guarantee against wear and delamination
Foundation: Colorbond, 316 Grade Stainless Steel, Aluminium
Profiles: Square ladder caps, round ladder caps, square nosings, bull-nosings, sheet

The same resins and aggregate as the Premium range, but without the woven medium. This guarantees durability, and maximum grip when in use.

Gripmaster Industrial

- Where to use:** Non-food grade areas, no exposed product. External to plant
Warranty: 5 year warranty against delamination
Foundation: Galvabond, 316 Grade Stainless Steel, Aluminium
Profiles: Square ladder caps, round ladder caps, square nosings, bull-nosings, sheet, 3mm plate, C-Stud

An aluminium oxide aggregate is baked to a foundation of your choice. Aluminium oxide is a very tough compound, and offers great value for money. Our Industrial grade Gripmaster is the most common type of anti-slip used in Australia and New Zealand.

Gripmaster Industrial X-TREME

- Where to use:** Oil rigs, Ports, Terminals, Waste water and Water Treatment Plants, Refineries, boats and other seagoing vessels
- Warranty:** 5 year warranty against delamination
- Foundation:** Galvabond, 316 Grade Stainless Steel, Aluminium
- Profiles:** Square ladder caps, round ladder caps, square nosings, bull-nosings, sheet, 3mm plate, C-Stud

Made with the same materials as our Gripmaster Industrial, but with additional resin coatings to protect all aggregate surfaces. For tough marine environments, when only the toughest nosings will do. Used in any areas where petrol and other hydrocarbons are present. Has an oversized aggregate to cater for offshore and wet area drainage, while still proving plenty of grip.

Gripmaster Lite

- Wear to use:** Non-food grade areas, no exposed product. External to plant
- Warranty:** 3 year conditional warranty against fracturing
- Foundation:** Isophthalic Resin Fibreglass
- Profile:** Nosings with dimensions 30mm drop, 70mm top and up to 3600mm long

FRP nosings are great for a quick-fix and are easily able to be cut to size onsite. Not recommended for heavy use areas or where there is falling objects on steps. The isophthalic resin coating means that it does not rust or become damaged when placed in areas with harsh chemicals.
